

## **BIM423 - SOFTWARE ENGINEERING**

**2022-2023 FALL SEMESTER**

**Virtual**

**Patient**

**Group 12**

**Week 10 / 06.12.2022 – 12.12.2022**

## Members

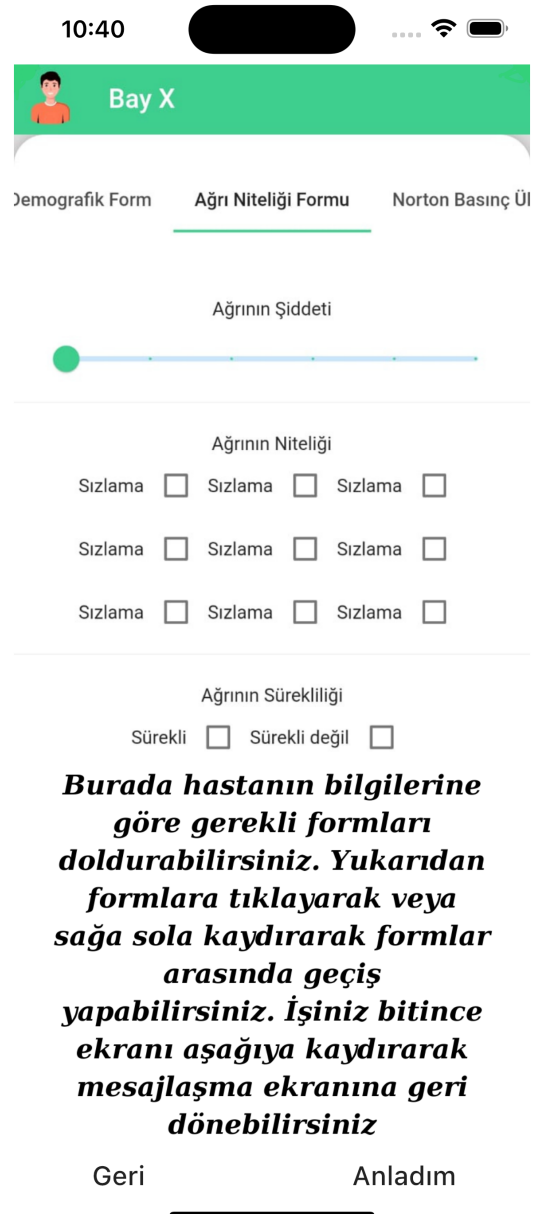

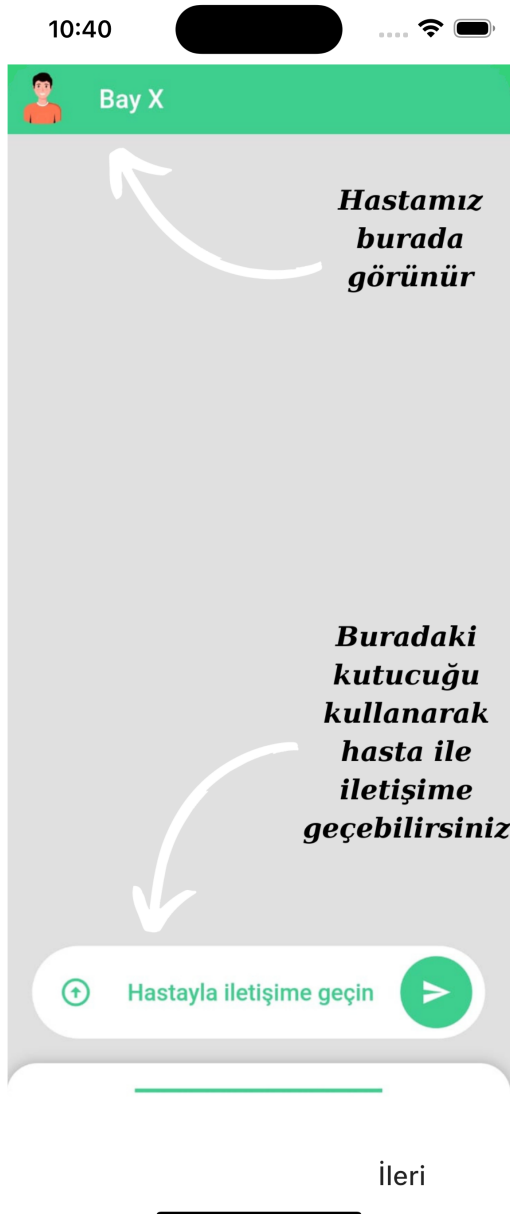

1. Uğur Dindar
2. Emre Kayacık
3. İdris Can Bölükbaşı
4. Oğuzhan Çetin
5. Umutcan Yavuz
6. Yunus Emre Korkmaz

Aile Sağlığı Merkezine (ASM) gittiğim zamanlarda hemşirem Kanser Erken Teşhis, Tarama ve Eğitim Merkezleri [KETEM] aracılığıyla 'Gaitada Gizli Kan Testi' vermem için beni ikna etmeye çalışıyordu. İlk teklif ettiğinde hem gaita vermekten utandığım için hem de kanseri kendime yakıştıramadığımdan kabul etmedim ve tarama yaptırmadım. Sonrasında birkaç kez daha konusu geçti ama hep kulak arkası ettim. Ailemde daha önce bu hastalığa yakalanan bir kişi olmamıştı. İnsan kendisine yakıştıramıyor, bende olmaz benim başıma gelmez diye düşünüyor. Şimdi düşününce keşke o zaman tarama testi yaptırmış olsaydım, hastalığım daha erken teşhis edilebilirdi.

Hastayla iletişime geçin

- Required forms have been created and their integrations with back-end have been done.

## Task Distribution

- **Emre Kayacık:** *Blood Sugar Trace Form and Norton Pressure Ulcer Form implementation have been done.*
- **Uğur Dindar:** *Code refactoring on API and refinements on data have been done. Vital Sign Form and Laboratory Results Form implementation have been done.*
- **İdris Can Bölükbaşı:** *Chat simulation integration with back-end has been done. An scenario has been added systematically with respect to actions and dialogues. Medicines Form implementation has been done.*
- **Oğuzhan Çetin:** *Still working with Fall Risk Form Implementation. Landing page for chat simulation screen has been done.*
- **Umutcan Yavuz:** *General design adjustments. Setting the unnecessary tabs invisible on login page.*
- **Yunus Emre Korkmaz:** *Hosting the web page on Firebase. Implementing the nurse's page.*

**Individual Contribution** (state as a percentage for each member, decide according to the contribution of the individual on that week. If a member does not have any contribution, please state)

Every single team done work of themselves. We can just say that every team contributed evenly to in behalf of progress of the project.

## Plans for the Following Week

Every team has their own page to represent plans for the following week and things done in previously weeks.

## Back-end Development Team

Plans for the following week:

- Expanding scenario when required

Back-end development of VPatient

Board

In Progress1

Draft

Expanding scenario if needed

+ Add item

Done26

Draft

Create grade endpoint

Draft

More code refactoring

Draft

Scenario/data refinement

Draft

Create user endpoint

Draft

Add readme.md consists instructions of how to run project

Draft

Provide an authorization endpoint to add user as 'authorized' -a.k.a admin-

Draft

Add authorization middleware into every single endpoint that must be authorized

+ Add item

## Mobile Development Team

Plans for the following week:

- Fall Risk Form implementation
- Provide communication between forms and chat screen
- Disease diagnosis screen
- Code refactoring
